

VINEYARD MAP of the Domaine's climates

DISCOVERY TOUR of the Domaine's climates

The circuit "Discovery of climates" carried out on the initiative of the students makes it possible to link 6 plots of the Domain of "La Viti de Beaune" during an easy hike.
At each of the six plots, a reading table gives many explanations to understand the terroir, wines and links that unite them through the work of man.

Due to the disappearance of most fruit trees in the vineyard, the establishment has taken the initiative to reintroduce a different species (almond, medlar, corneir, knotting, peach, cherry) on each plot.

"La Viti de Beaune", founded on an old wine estate, has been training future winemakers and executives in the vine and wine sector for over 120 years. The estate now covers 23 hectares, 40% of which is Premier Cru. The sale of bottles of the production to individuals is ensured in the cellar and at a distance throughout the year and at various trade fairs.
